Product description

Lead sheet / X-ray lead foil 0.5 mm

Lead sheet with a thickness of 0.5 mm is used for X-ray shielding, radiation protection, wall and door lining, industrial shielding and technical insulation. The 1 m2 format is convenient for installation in medical, dental, veterinary and industrial rooms.

The material is suitable for projects where a dense Pb layer is required to reduce X-ray exposure. The final thickness should always be selected according to the radiation protection design and equipment parameters.

- material: lead Pb, technical grade;
- application: X-ray rooms, shielding, doors, walls, housings and technical barriers;
- format: 1 m2;
- supplier: Leadpol.
